Projects

Pebble work- [DEMO](#) | [CODE](#)

- Responsive Volunteer events website
- Volunteer event platform for seamless organization. Features: User authentication ,event filtering,creation ,participation, and chat for volunteers created using Nextjs,Firebase,Tailwind css and unit test

Reelo - [DEMO](#) | [CODE](#)

- Platform offering seamless browsing to discover movies
- Built a responsive movie website with Next.js, daisy-UI and API. Reelo is Movie hub offering seamless browsing to discover movies, explore actors, genres, and top-rated films .

Technical Skills

- Nextjs
- Nextauth
- Mongodb
- Tailwind
- Firebase
- GIT

Soft Skill

- Adaptability/Flexibility
- Strong communication and collaboration skills
- Multi-tasking
- Leadership

Languages

- English
- ARABIC
- French

VOLUNTEERING

Leading and Animating a Workshop 02 2024 -Algeria Fintech & E-commerce Summit

Algeria Fintech & E-commerce Summit
Animating and Leading a Workshop coding for non-coders, During the workshop, we covered the basics of coding, starting with algorithms and programming, then moving on to JavaScript. The workshop was aimed at entrepreneurs and students who are interested in developing their own web applications

About Me

Dynamic Engineering and Frontend Developer with a background in business development. Skilled in engaging with clients, customizing and building responsive web interfaces, and ensuring seamless user experiences. Proven ability to understand client needs, suggest appropriate technologies, and execute projects from concept to completion.

Professional Experience

IT engineer - SARL TAHRAOUI *onsite /Full Time*

- Key Responsibilities:
- Developed a Comprehensive Management System (GPAO): Designed and implemented a robust system to manage and monitor production processes, including tracking key operations, raw material usage, and identifying primary causes of production stoppages. Enhanced production monitoring by integrating features to define causes of downtime, facilitating targeted process improvements, and increasing overall production tracking efficiency by 50% while reducing production stoppages by 35%.
 - QR Code Generation for Production Tracking: Developed a unique QR code generation system for real-time production tracking, providing secure access for admins and limited visibility for client
 - Stock Management System: Created an optimized system for stock management to maintain inventory accuracy, manage supply chains, and track material usage effectively.to Reduced stock discrepancies
 - IT Support and Troubleshooting: Provided responsive IT support, addressing software issues, responding to user requests, and resolving networking problems in the local network

Frontend Developer-sadeem *remote /Full Time*

- Customizing Templates: customized website templates to meet specific user requirements
- Building UI Components: designed and implemented various user interface
- Responsive Design: ensured that the layout adapted seamlessly to different screen sizes, including desktops, tablets, and mobile devices

Internship - Golden Service *onsite /Full Time*

Junior web developer create an e-commerce website from scratch using JavaScript, PHP and SQL.

Education

Frontend Web Development - Re:Coded JUN 2023 - DEC 2023

- Re:Coded Immersive bootcamps are highly competitive, with a 5% acceptance rate.
- Completing a 6-month immersive web development bootcamp, with 300+ hours of curricula and project-based learning
 - Technologies: HTML, CSS, JavaScript, React
 - Working with various development teams to create products across industries.

Master's Degree in Networking - The University of Biskra 2020— 2024

- Thesis title Intrusion detection system for IoT network (simulation of attacks using the weakness of routing protocol then implementing a detection system to enhance the routing protocol).

Certificates

- Certificate title - Institution
02 2023— 9 2023
- CCNA Introduction to Networks Certificate.
 - CCNA Switching, Routing and Wireless Essentials
